SUMMARY

Results-driven full-stack developer with 5 years of experience building scalable AI-integrated applications using Angular, Spring Boot, LLMs, and agentic AI systems. Proven expertise in designing multi-agent AI platforms and delivering high-impact projects.

EXPERIENCE

Specialist Programmer

Infosys

June 2023 – Present, Hyderabad

- Designed and launched an AI-powered customer support platform using Angular and Spring Boot to provide seamless communication across multiple channels.
- Architected a multi-agent AI system, coordinating specialized agents for natural language understanding, automated ticket classification, and efficient knowledge retrieval.
- Developed a natural language query builder that allows non-technical users to create complex support requests using intuitive, everyday language.
- Managed end-to-end responsibilities including design, development, integration testing, quality assurance, and production deployment of distributed application modules.

Digital Specialist Engineer

Infosys

May 2021 – June 2023, Bengaluru

- Architected and deployed a multi-level telemetry dashboard using Angular and Apache ECharts to provide interactive, real-time visualizations for various application services.
- Engineered a robust validator microservice to ensure data integrity across high-throughput Kafka and StreamSets pipelines.
- Led a major migration of the Angular framework to the latest version, modernizing the codebase and enabling new security and performance features.
- Implemented a comprehensive unit testing framework using Karma and Jasmine to ensure high code quality across dozens of frontend components.

EDUCATION

Bachelor of Engineering (ECE)

The Oxford College of Engineering • Bengaluru • 2020

CERTIFICATIONS

Microsoft Certified Azure AI Fundamentals

Infosys • 2026

• <https://learn.microsoft.com/en-us/users/pyogesh-1051/credentials/464070d8f47d329a>

Makeathon 2023 Edition (Generative AI theme)

Infosys • 2023

- Led a team of five to victory in a Generative AI based makeathon by developing an innovative chatbot application. Utilized React, TailwindCSS, and Flask to implement features such as contract generation, comparison, and analysis, demonstrating strong leadership and full-stack integration skills

SKILLS

Frontend: Angular, TypeScript.

Backend: Spring Boot, Python, Java.

AI/ML: LLM Engineering , Agentic AI , RAG, Prompt Engineering.

Data: MongoDB, PostgreSQL, Redis, Kafka, Streamsets.

Cloud & DevOps: AWS, Docker, Azure

Testing: Karma, Jasmine, Unit and Integration Testing.
